Experience

ProActive Solutions Portugal, Curricular Internship

Oct 2023 – Feb 2024

- Developed a web-based file management system using Java, Angular, and MariaDB, enabling secure file uploads, categorization, and sharing.

Projects

Patient Management System

- Designed and developed a distributed healthcare platform composed of independent Spring Boot microservices.
- Implemented Kafka-based event-driven communication, CQRS-style read optimization, gRPC service integration, and Redis caching to improve scalability and service decoupling.
- Built API Gateway rate limiting, centralized monitoring with Prometheus and Grafana, and automated integration tests using JUnit 5 and Rest Assured.
- Tech: Java, Spring Boot, Kafka, gRPC, Redis, PostgreSQL, Docker.

Pet Clinic Management System

- Developed a microservices-based backend for managing pets, appointments, medical records, and notifications.
- Implemented service discovery with Eureka, authentication and authorization with Keycloak, and asynchronous communication through Kafka.
- Improved resilience using Resilience4j Circuit Breakers and implemented distributed monitoring, logging, and tracing with Prometheus, Grafana, Loki, Tempo, and OpenTelemetry.
- Tech: Java, Spring Boot, Kafka, Keycloak, Eureka, MongoDB, MySQL, Docker.

Systems Integration Platform

- Developed a data integration platform for automated ingestion, transformation, and storage of structured data.
- Designed REST APIs for integration with external systems and flexible data access.
- Implemented asynchronous workflows using RabbitMQ to improve reliability and support high-volume processing.
- Tech: Python, PostgreSQL, RabbitMQ, Docker.

TaskMaster

- Developed a mobile application for project and task management with real-time synchronization.
- Designed backend APIs for authentication, persistence, and business workflows.
- Implemented responsive interfaces and optimized data handling to improve user experience.
- Tech: Kotlin, JavaScript, Prisma, PostgreSQL.

Education

Polytechnic Institute of Viana do Castelo, Computer Engineering

Sept 2021 – July 2024

Skills

Programming Languages: Java, Python, JavaScript, TypeScript, Kotlin, SQL

Technologies: Spring Boot, Kafka, PostgreSQL, MySQL, MongoDB, Docker, Git, Angular

Languages: Portuguese (Native), English (Fluent), French (Basic), Spanish (Basic)
