Education

Polytechnic Institute of Viana do Castelo, Computer Engineering

Sept 2021 – July 2024

Experience

ProActive Solutions Portugal, Curricular Internship

Oct 2023 – Feb 2024

- Designed and developed a web-based file management system tailored for business use, enabling seamless file uploads, categorization, and secure sharing.
- Languages and tools used: Java, Angular, MariaDB.

Projects

Systems Integration

- Built a data processing system to automate ingestion, transformation, and storage of structured data for efficient querying.
- Designed APIs to enable integration with external services and flexible data access
- Implemented asynchronous processing to improve reliability and handle high data volumes

Pet Clinic Management System - Spring Microservices

- Developed a scalable backend system using a microservices architecture to manage business operations and user workflows.
- Implemented secure authentication and inter-service communication to ensure reliability and fault tolerance
- Enabled monitoring and observability to support system performance and debugging
- Language and Tools Used: Java, Spring Boot, MySQL, Kafka, Keycloak, Docker, Resilience4j, MongoDB, Grafana, Prometheus.

TaskMaster | Mobile Application for Project Management

- Built a mobile application to manage tasks and projects with real-time data synchronization.
- Developed a backend API to handle data persistence, authentication, and business logic
- Improved user experience through responsive design and efficient data handling
- Language and Tools Used: Kotlin, Javascript, Prisma, PostgreSQL.

Skills

Programming Languages: Java, Python, .NET, SQL, NoSQL, Javascript, TypeScript, Kotlin, C

Technologies & Tools: Spring Boot, Angular, HTML, CSS, Git, Docker, RabbitMQ, Kafka
